Annual IACP-iXP Corp. Excellence in Technology Awards

Cranbury, N.J.—iXP Corp., a leading public safety consulting and technology company, joined with the International Association of Chiefs of Police (IACP) to present the 7th Annual IACP-iXP Excellence in Technology Awards.

This international awards program is designed to recognize exceptional, innovative and extraordinary achievement in law enforcement technology-based programs, efforts or initiatives. This year's awards were presented to agencies at the 34th Annual IACP Law Enforcement Information Management Conference recently held in Atlanta, Ga.

iXP and IACP presented nine awards in three categories. The categories were Response to Computer-Related Crime; Excellence in Law Enforcement Communications and Interoperability, and Innovation in Information Technology.

This year's winners included Holland Police Department (Holland, Mich.) for its Video Analysis and Digital Forensics solution; Missouri State Highway Patrol for its Interoperable Public Safety Communications Platform; National Forensic Science Technology Center (NFSTC) (Largo, Fla.) for its Forensic Information Data Exchange (FIDEX) solution; Wilfrid Laurier University Special Constable Service (Waterloo, Ontario, Canada) for its Communications Center; and Maricopa County Sheriff's Office (Phoenix, Ariz.) for its Facial Recognition Unit.

William E. Metro, president and chief operating officer of iXP Corp., stated, "At iXP, we have a sincere appreciation for each agency's unique operational needs and legacy technology environments. We respect and want to recognize what has been done to improve the exchange of information and system interoperability through the use of innovative technologies.
