

TECHNOLOGY INTEGRATION

SERVICES DELIVERS :

- Design and Build Facilities
- Develop Custom Software
- Integrate Disparate Systems
- Security for College & Medical Campuses
- Hire & Train Personnel
- Security Measures
- Data Conversion & Analytics
- Long-Term Tech Solutions
- Radio
- CAD & RMS & E-911
- Technical Area Programs

A Technology Solution For Your Unique Needs

IXP has the experience and proven success to help clients plan and implement the right mix of technologies.

IXP's technological processes understand the importance of considering the **full-life cycle** of the technologies and infrastructures that support emergency communications. The pace of technological change is one of the biggest challenges in public safety and emergency communications.

With this challenge in mind, our subject matter experts are well versed in every technical product category, and can implement the right mix of technologies including **radio, portable electronic command boards, CAD, RMS, Mapping, E-911, AVL, Wireless Devices and Telephony** to meet client needs.

IXP's Technology Integration services can deliver turn-key solutions by:

- Having the ability to **manage Communication Center technology** for clients who are in need of the proper technology within their new or pre-existing communications center .
- Holding a team of technical and programming experts that are highly skilled in **data conversion** for clients seeking data conversion services.
- Working closely with architectural and engineering firms in the building design process to ensure that the site is properly prepared to **support technology upgrades**.
- Having significant experience **designing and implementing state-of-the-industry security architectures** for municipal, colleges, universities, utility, medical, and corporate clients.
