SAIF® Technical Services The SAIF® Solution for Your Public Safety Needs

IXP has the experience and proven success to deliver all your technical services needs.

IXP understands the importance of considering the full-life cycle of the technologies and infrastructure that support emergency communications. The pace of technological change is one of the biggest challenges in public safety and emergency communications.

With this challenge in mind, our subject matter experts are well versed in every technical product category including **Radio, Video Analytics, CAD, RMS, Mapping, E-911, AVL, Wireless Devices, Logging and Recording, Telephony**, and all other technology needs.

Our solutions are designed, developed, and delivered using our proprietary **SAIF® Methodology**. This ensures that our customers receive the highest quality, performance, and value.

IXP's Technical Services deliver turn-key solutions by:

- Managing Communication Center technology.
- Recommending, procuring, installing, and implementing systems and technology.
- Providing a team of technical experts for every need.
- Working closely with architectural and engineering firms in the building design process to ensure that the site is properly prepared to support current and future technology needs.
- Designing and implementing state-of-the-industry public safety/security architecture for municipal, college, university, utility, medical, and corporate clients.
